

Biosimilars: A Safe & Effective Option for Patients

In the U.S., the U.S. Food and Drug Administration (FDA) is approving more biosimilars and patients are benefitting from these new medicines. Broader access to these safe, effective treatments allow patients to initiate biologic therapy earlier in their treatment programs.¹

A biosimilar is a biologic medicine that is

HIGHLY SIMILAR

to a brand biologic medicine.

Same safety and efficacy as their biologic counterpart

Same mechanism of action

Rigorous FDA testing and review; lower cost to patients and the health system

Companies that manufacture biosimilars are committed to providing safe, effective products

Biosimilars are: Safe, effective, more affordable and offer improved patient access.

SAFE

EFFECTIVE

AFFORDABLE

ACCESS
